2. The Situation after 1947

jail he was ill for several months.

a. After the mentioned specialists had left for the Soviet Union the plants listed in section 1 were allegedly to continue operations. However, their dismantling was unexpectedly ordered in January 1947. All the equipment was dismantled and all the files and records shipped away.

The Soviet agency and some of the remaining specialists, including Director Friedel, were transferred to the

_	

25X1A

Geraetewerk in Sondershausen. In this plant the apparatus needed by the scientists deported to the Soviet Union were built. A correspondence was maintained between the plant and Dr. Coermann who had some of his apparatus built in the plant.

(1) Soviet supervision in Sondershausen:

Technical manager: Grenetski General manager: Kapmann

The management of this plant was directly responsible to the Technical Bureau in Karlshorst (Chertok, Korolyev, Podenanols-ki, Melamid had returned to Moscow).

(2) German management in Sondershausen:

Technical management: Engineer Prope

angineer schaefer angineer Caspary

Engineer Juchan and others

Business management: Dr. Friedel.

b. Engineers Caspary and Suchan (spelling possibly not quite correct) were said to be arrested for political reasons. They were not seen again,

Engineer Schaefer and his dependents fled to the West.

- c. Dr. Friedel and engineer Drope run a bureau of the DKA, presumably the central office, at 2 Barbarastrasse, in Halle on the Gaale River. Dr. Friedel reportedly is the only man to have a complete list of the personnel of the "Zentral-worke Bleicherode". All other records were destroyed in 1947.
- d. It is rumored that Groettrup is no longer alive.

Engineer Zerschinsky is said to be held under arrest in the Soviet Union for political reasons.

Groettrup first lived in Moscow, presumably in the "Bolshevo Settlement." His correspondence with Dr. Friedel suddenly stopped. Jasper, the manager of the Klein-Bodungen Plant, indicated the intention of committing suicide.

- e. The group of Bleicherode specialists was split up in the Soviet Union. After being given a great reception in Moscow they were distributed to the individual institutes. Some remained in Moscow. Dr. Karl Borkmann for instance, is in Moscow-Monino, Building No 1 of the Banctorium. Dr. Coermann's address is: Moscow-Bolshevo, Mew Jettlement, House Mo 4. Viebach's and Dr. Schlier's address is: Ostashkov, Kalinin Oblast, post office box No 1.
- f. The majority of the scientists concerned are said to stay in Ostashkov. Some of them who still amintain a correspondence with friends in the Soviet Lone of Germany mentioned this locality as their place of residence. They live there, together

with their families, in a large German settlement on an island in Lake Seliger.

25X1A

Comment:

- a. The report again describes the by now well-known development of the y-weapons plants in the area of Nordhausen up to January 1947.
- b. The locations of the German specialists listed in para 2 are confirmed by letters.
- c. Para 2 does not furnish any new information. However, it makes it improbable that any further development work in the field of y-weapons is being done in the remaining plants. This assumption is supported by the more recent reports on this subject.
- d. The rumors concerning Dr. Goettrup's death were mentioned in two previous reports.
